Introduction

The document attempts at capturing various actions that the NGO takes to conduct different events. This includes interactions covering planning, logistics, communications, event orchestration and media management that go into holding events and running programs. Usually the events are planned a few months in advance. This causes communication between different events to interleave. It's harder to track which event thread has been responded to / handled and which is pending. This is limiting the capacity of the team to hold more events.

List of events covered

- Distribution of pre-loved items
- Wellness
 - Yoga / Zumba / Meditation
- Skill Enhancement
 - Financial Literacy
 - Computer Literacy
 - Language Literacy

Event-wise activities

Distribution of pre-loved items

Planning

- Initiation communication within the team on holding the event (whatsapp)
- Identify contacts of supporting organizations like condominium management and businesses (email + whatsapp)
- Establish venue and schedule with each entity for collection (email)
- Transport company communication to line up collection schedule (email + whatsapp)
- Ware house communication to hold collected items (email + whatsapp)
- Communication to the benefactor migrant workers (whatsapp, email, notice boards), Social media updates (whatsapp, facebook, LinkedIn)
- Volunteers registration(<https://www.giving.sg/>, email, whatsapp)

Execution

- Event day actions with volunteer organising
 - Sort the collected items
 - Manage item distribution
 - Capture memories
 - Cleanup of the venue

Post execution

- Volunteer coordination to send certificates (email), acknowledgement (whatsapp)
- Social media updates with captured memories and other updates (whatsapp, facebook, LinkedIn)

Wellness – yoga / zumba / meditation

Planning

- Initiation communication within the team on holding the event (whatsapp)
- Venue booking to hold the event (email)
- Communication to the benefactor migrant workers (whatsapp, email, notice boards)
- Yoga / Zumba / Meditation teacher volunteer engagement (email, whatsapp)

Execution

- Event day actions
 - Setup the audio system
 - Capture the memories
 - Post event food distribution

Post Execution

- Volunteer coordination to send acknowledgement (whatsapp, email)
- Social media updates with captured memories and other updates (whatsapp, facebook, LinkedIn)

Skill Enhancement

For skill enhancement like computer literacy, there is a need to track dependency in the courses that a benefactor has attended. This is a problem that is yet to be solved, stopping the NGO from going deeper in the skill development. The same holds good for language learning.

Other skills like financial literacy are administered using interactive games.

Planning

- Initiation communication within the team on holding the event (whatsapp)
- Identify and coordinate the venue with suitable infrastructure to support the session(email, whatsapp).
 - Computer facilities to support computer literacy
 - Classroom facilities to support language learning or financial literacy
- Communication to the benefactor migrant workers (whatsapp, email, notice boards), Social media updates (whatsapp, facebook, LinkedIn)
- Course administration contact coordination (email, whatsapp)
- Volunteers registration(<https://www.giving.sg/>, email, whatsapp)

Execution

- Event day actions –volunteer organising
 - Infrastructure setup - computer labs / seats for holding the sessions
 - Capture the memories
 - Wrap up the venue

Post execution

- Volunteer coordination to send certificates (email), acknowledgement (whatsapp)
- Social media updates with captured memories and other updates (whatsapp, facebook, LinkedIn)
